Magnesium Capsules

Cows calving... are they covered for magnesium?

Reliably providing available Mg++ in the rumen every day for 9-12 weeks

www.agrihealth.co.nz
Rumetrace Magnesium Capsules are registered pursuant to the ACVM Act, 1997 No A10958.

Beef cows

Beef cows dying around calving is costly. Use Rumetrace magnesium capsules 3 weeks pre-calving. Grass Staggers risk reduced.

- Milk production from pasture (Holmes, et al, Milk Production from Pasture, 2002).
- *Mg requirements for liveweight (LW) gain are not included in this example.
- Liveweight gain typically requires 0.45g Mg / kg LW gain.

Dairy cows

Dairy cows need magnesium every day because they cannot mobilise magnesium stored in the body.

- Demands for magnesium increase during lactation.
- Cows with higher milk production are at higher risk.
- The magnesium in feed and supplements not absorbed by the cow is lost in faeces.

Magnesium Metabolism

Calcium Homeostasis

Stop mucking around with late calvers. Use Rumetrace magnesium capsules 3 weeks pre-calving, only once. No more daily mag. ox. for springers!
