

Directions:

For adding to the drinking water or liquid diet of calves, pigs and poultry. Must be continuously administered when given in the drinking water, all other sources of water should be removed until the medicated water has been consumed. Prepare fresh solutions daily.

Dosage:

Calves: For bacterial enteritis, salmonellosis, pneumonia, etc. administer approx.

100mg/kg bodyweight in liquid diet or water each day, until 24 hours after symptoms disappear. For a 50kg calf this equates to 5 grams of OxytetSol 10% powder daily.

Pigs: For bacterial enteritis, enzootic pneumonia, mastitis, metritis, etc. 2.5 – 4g/litre drinking water daily (approx. 100mg/kg bodyweight daily) until 24 hours after symptoms disappear.

Poultry: For respiratory infections, bacterial enteritis, etc. 2.5g/litre drinking water daily (approx. 20mg/kg bodyweight daily) for 5 – 10 days or until 24 hours after symptoms disappear.
